Installation

New AFFTAC_2004 Users:

Install AFFTAC_2004 from the installation package by following the steps below:

1. Unzip the installation zip file.
2. Close all Windows applications.
3. Run setup.exe, taking note of the **installation directory**.
4. If you are an existing user, you may copy your database files (*.adb) from the previous versions' installation folder to the new **installation directory**.

Existing AFFTAC_2004 Users:

If you already have AFFTAC_2004 installed, simply install the GUI by saving its .exe file over the existing one in your AFFTAC_2004 installation directory.

If you have problems or concerns e-mail srunnels@srconsult.com.

New Features & Bug Fixes

A hard-coded user name and password was added to the GUI. A build variable, which displays in the Help-About screen was also added.

A new release was created.

Modifications

1. Added the global variable “Build”.
2. Added logic in the license window in two places to handle the hard-coded user name and password.

Testing

The new installation was downloaded to a separate PC. It installed and ran successfully using the hard-coded user name and password.
